---	---

This presentation is FREE, but space is limited so please register on-line: www.PACEplace.org

About The Seminar

Kathi Calouri, Ph.D. and Eric Hamblen are the founders of Project PACE, Inc. and PACE Place in Oregon. Kathi and Eric will present information on how an individual's ability to process information using specific areas of the brain impacts emotional regulation and the ability to learn. This seminar will be appropriate for parents and professionals who are interacting with individuals of all ages and skill levels with diagnoses of developmental delays that affect social learning (e.g., Autism Spectrum Disorders, Asperger's Syndrome, ADD, ADHD, NVLD, PDD-NOS). Their years of experience working with individuals with developmental delays and their families was the impetus for the creation of a therapy tool called the Connector Rx which leverages the parent-child bond to improve the child's ability to organize social information, develop meaningful relationships, and remediate core deficits associated with social learning disorders. Kathi and Eric will discuss strategies that can be used at home, in the school, and in the community, helping the child gain competence in all environments.
